Simple to use and equally simple in design, the SERIES-O is a single stage unit with a minimum number of parts, meaning lower maintenance. This is further assured by the fact that the unit has no moving O-ring seals to wear and leak.

- Triple filter system
- Safety valve
- Tamper resistant design
- O-ring
- Colour coded
- No tools required to routinely disconnect the regulator from the cylinder valve

Benefits
- Reduces risk of foreign materials coming into contact with the high pressure gas
- Robust protection of staff and patients from high pressure failures
- Durability reduces possibility of breakage
- No seals to wear and tear
- Easy to recognise and identify the gas used by the regulator
- Simple to operate

---

**Oxygen Regulator**

**Part Number**
- 518804 AUST
- CWS18804 N.Z.
- RENTAL AVAILABLE IN N.Z. (INCLUDES FLOWMETER 0-15LPM)

**Specifications**
- Inlet pressure: up to 20,000 kPa (2,900 psi)
- Outlet pressure: 400 kPa (58 psi)
- Inlet fitting: pin index yoke
- Outlet fitting: sleeve index system – AS 2896
- Weight: 980 g

A full range of SERIES-O regulators is available for specific medical gases.

**Manufacturer**
- Comweld

**Quality Assurance**
This device is designed to conform to the following standards:
- AS 3840
- AS 2896
SERIES-O™ Regulator

Regulator – Air

Part Number 518809 AUST.  CWS18809 N.Z.

Regulator – Nitrous Oxide

Part Number 518808 AUST.  CWS18808 N.Z.

Regulator – Entonox

Part Number 518810 AUST.  CWS18810 N.Z.
